

Preliminary schedule and working tracks for SBX retreat 9/6-2026

During the upcoming SBX retreat, the working sessions will be dedicated to practical individual or group work. There are four possible tracks to choose in-between:

1. **Metadata** – improving and validating our metadata.
2. **Semester report** – documenting activities, publications, and achievements from the past semester.
3. **Video manuscript** – preparing a script for a five-minute presentation video.
4. **Blog post** – writing a blog post related to your work at Språkbanken.

Below is a preliminary schedule proposal. We will begin with a dedicated session on metadata. During the second session, everyone who is not part of the platform group can either continue working on metadata or choose one of the other three tracks. You are not expected to work on all the tracks, you are encouraged to choose the ones that interest or motivate you most.

10:15–11:30 – Session 1: Metadata

- Introduction by Martin and Arild to the workflow for improving and validating our metadata.

12:30–14:30 – Session 2: Meeting and working session

- Platform group meeting.
- Others continue working on metadata, the semester report, the video manuscript, or the blog post.

15:00–16:00 – Session 3: Working session

- Continue working on metadata, the semester report, the video manuscript, or the blog post.
